About the Project

A functional web application built as a school team assignment
– practicing real-world collaboration and coding skills.

Teamwork via GitHub

Version control and collaboration

Functional App

Built a working application from scratch

Problem Solving

Sharpened programming and logic skills

Planning & Testing

Learned structured project workflows

Technologies & Tools

LANGUAGES

HTML5

Semantic structure

CSS3

Styling & layout

JavaScript

Interactivity & logic

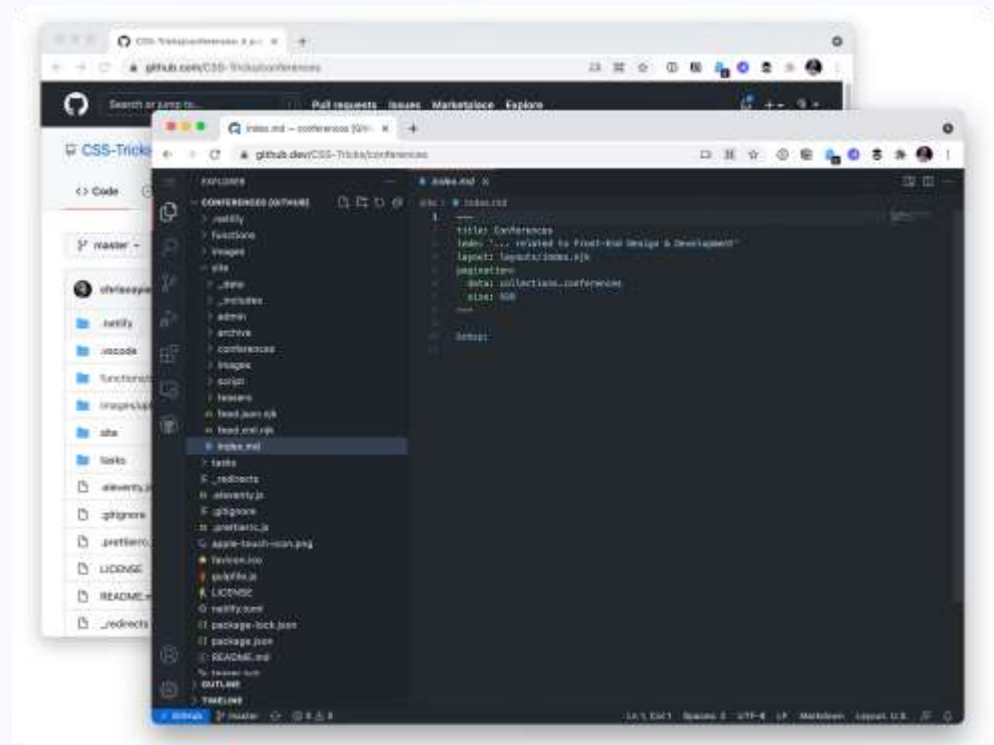

TOOLS

Visual Studio Code

Primary editor

GitHub

Version control & collaboration

Team Roles

Borislav Andrikov

PROJECT MANAGER

GitHub repo, task
coordination

Vasilin Gospodinov

CODE DEVELOPER

App structure, feature
implementation

Sofiya Chapkina

DOCUMENTATION

Docs & presentation design

Mihail Hristov

QA & BUG FIXES

Testing & quality assurance

Development Process

Four focused sprints took us from concept to a polished, working application.

What We Achieved

Built a Working App

Mastered GitHub

Grew as a Team

Tested & Delivered

And with that, let's move on to the website!
